The WebFOCUS App Studio Interface

Canvas

➢ Provides an active preview of your application development.

Quick Access Toolbar

➢ Displays frequently used commands, such as New, Open, Save, Print, Undo, Redo, Cut, Copy, Paste, and Run.
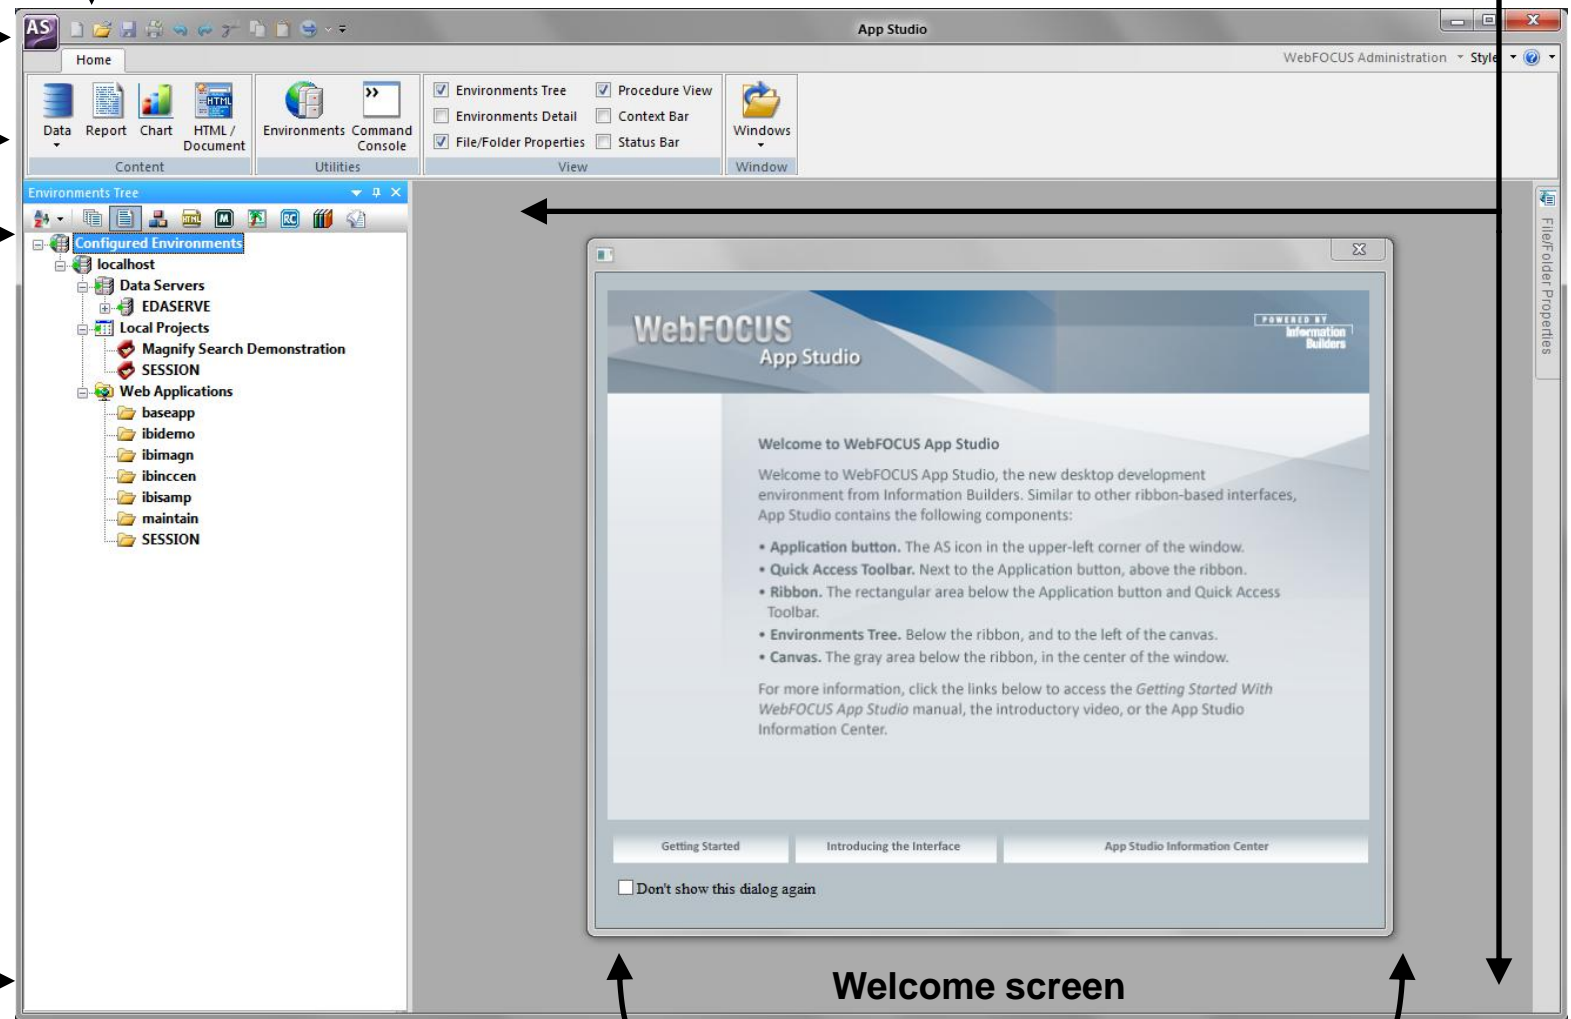

Application button

➢ Provides access to the Application menu of file-related commands.

Ribbon

➢ Displays both static and contextual tabs of commands that you can use to build and customize applications.

Environments Tree panel

➢ Provides access to the WebFOCUS environments you configure, and files you create under each development area.

Welcome screen

➢ Introduces the new App Studio user interface and provides hyperlinks to get you started with the product.
